Projects

Top 10 Reasons Why | 2020

- This was made for a school project where the user would be brought to a website made in code.org of 10 reasons why they should watch a certain movie.

Jumping Turtle | 2022

- This was made in code.org using css and html. The user would use the arrow keys and spacebar to make a turtle jump onto randomly generated platforms over and over and if they hit the bottom of the screen the game would end.
